

PRODUCT DATA SHEET

A-1

BLUE PTFE SEALANT

DESCRIPTION

A-1 is an industrial, blue thread sealant that includes PTFE resins for greater sealing power. A-1 will not harden or dry out over time and remains flexible for easy disassembly. It is non-toxic, is easy to clean-up and will stick to hot oily threads.

APPLICATION

A-1 can be applied to all types of pipe threads including steel, brass, iron and PVC, ABS and CPVC plastic. A-1 is recommended for use on water, steam, air, natural gas, refrigerants and ammonia service. It is not for use on oxygen service.

A-1 has a temperature range from -50F to 500F; and pressure range up to 1,500 psi (102 BAR) for gas and up to 5,000 psi (340) for liquid.

Use A-1 as supplied in its original container. Stir well before using. Brush liberally onto make threads. Make up joint in normal manner. A brush cap is included in each can.
