

PRODUCT DATA SHEET

A-15
PIPE LUBRICANT

DESCRIPTION

A-15 is an industrial, water-soluble lubricant for use in assembling gasketed pipe. It is designed for use with natural or synthetic rubber and plastic gasket seals in the joining of plastic or metal pipe using a push-on joint. A-15 lubricates the gasket and joint surfaces for ease of assembly.

APPLICATION

A-15 applications include potable water, drain, waste, vent and sewer systems. A-15 can be applied to wet or dry surfaces.

A-15 is non-toxic and does not support bacteria and does not convey taste or odor to fluids.

Follow the directions on can label for application information. Apply it evenly over the entire surface requiring lubrication, but avoid using an excess amount. Do not leave dry spots. Do not place lubricant in the ring groove. Use A-15 as supplied in its original container.
